PROFESSION SUMMARY

Hands-on experience in all types of QA testing and team building coupled with strong problem-solving, collaboration, communication, and adaptability skills lead to outstanding project results and top performance. Expert in writing comprehensive test plans, designing procedures, and executing embedded, system, and integration tests. Extremely dedicated and display high degree of accountability, honesty, and integrity.

EDUCATION

California State University, East Bay — *Graduated - December 2025*

Bachelor of Science in Computer Science

TECHNICAL SKILLS

- **Languages:** Java, Kotlin, Python, C++
- **Test Automation:** Selenium, REST Assured, TestNG, Appium
- **API Testing:** REST APIs, Postman, Newman, JSON validation, HTTP/HTTPS, Request/Response analysis
- **Mobile Testing:** Android Studio, Emulator, Activity Lifecycle Testing, Configuration Change Validation
- **Databases:** MySQL, MongoDB
- **CI/CD & Tools:** Git, GitHub, Jira
- **Debugging:** Logcat, Breakpoint Debugging, Stack Trace Analysis

EXPERIENCE

E-Commerce Platform Product & Implementation Lead — *Dec 2025 – Current*

GK Business Group,Hayward,CA

- WordPress, WooCommerce, Elementor (PHP, MySQL)
- Led redesign and operational configuration of WooCommerce-based e-commerce platform supporting 2,500+ SKUs
- Defined homepage UX structure, navigation flows, promotional modules, and departmental taxonomy to enhance customer navigation clarity and product discoverability
- Designed and implemented curbside pickup workflow including checkout metadata collection for vehicle make/model and color
- Configured product categories, metadata, inventory workflows, and backend-driven promotional timers for weekly campaigns
- Directed functional validation of cart logic, checkout behavior, and content updates prior to production release

IT Student Assistant — *Aug 2025 – Dec 2025*

CSU East Bay – STEM Lab, Hayward, CA

- Analyzed student data across 3+ departments writing SQL queries and Excel reports to identify bottlenecks
- Supported Canvas IT platform issues for 500+ people leveraging M365 suite and Google Workspace tools

PROJECTS

Full-Stack Portfolio Web Application with Public Leaderboard & REST API — *FEB 2026*

React (Vite), Node/Express, MongoDB, Git/GitHub

- Designed and deployed a full-stack portfolio web app using React, Express REST API, and MongoDB.
- Developed a real-time Typing PRO game with 15/30/60-second modes and accurate gross WPM, net WPM, and accuracy calculations.
- Built a ranked leaderboard returning top-10 results per time mode using indexed MongoDB queries for efficient sorting.
- Implemented RESTful endpoints for health checks, contact submissions, and score persistence with input validation and structured error handling (200/400/500 responses).
- Developed a QA Test Lab module integrating API health checks, contract validation, negative test scenarios, and backend-driven test data to simulate automation tracking.

LEADERSHIP AND PROFESSIONAL INVOLVEMENT

Pioneers for Change Fellow

- Led an on-campus workshop for 200+ attendees, driving digital outreach and community engagement initiatives
- Managed event planning, stakeholder coordination, and structured delivery to ensure high participation and execution quality

HackathonParticipant,California StateUniversity - East Bay, Hayward, CA

- Collaborated in cross-functional team to prototype software solutions under time constraints
- Applied rapid problem-solving, technical communication, and core development fundamentals in a competitive environment

Operations Manager, GK Business group , Hayward, USA

- Directed digital marketing and website optimization initiatives to improve customer engagement and brand visibility
- Applied UI/UX principles, user flow optimization, and performance analytics to enhance campaign effectiveness
