- **Languages:** Java, Kotlin, Python, C++, JavaScript
- **Test Automation:** Selenium, REST Assured, TestNG, Appium
- **API Testing:** REST APIs, Postman, Newman, JSON validation, HTTP/HTTPS, Request/Response analysis
- **Mobile Testing:** Android Studio, Emulator, Activity Lifecycle Testing, Configuration Change Validation
- **Databases:** MySQL, MongoDB
- **CI/CD & Tools:** Git, GitHub, Jira
- **Debugging:** Logcat, Breakpoint Debugging, Stack Trace Analysis

EXPERIENCE

E-Commerce Platform Product & Implementation Lead *Dec 2025 – Current*
GK Business Group,Hayward,CA
WordPress, WooCommerce, Elementor (PHP, MySQL)

- Led redesign and operational configuration of WooCommerce-based e-commerce platform supporting 2,500+ SKUs
- Defined homepage UX structure, navigation flows, promotional modules, and departmental taxonomy to enhance customer navigation clarity and product discoverability
- Designed and implemented curbside pickup workflow including checkout metadata collection for vehicle make/model and color
- Configured product categories, metadata, inventory workflows, and backend-driven promotional timers for weekly campaigns
- Directed functional validation of cart logic, checkout behavior, and content updates prior to production release

IT Student Assistant *Aug 2025 – Dec 2025*
CSU East Bay – STEM Lab, Hayward, CA

- Analyzed student data across 3+ departments writing SQL queries and Excel reports to identify bottlenecks
- Supported Canvas IT platform issues for 500+ people leveraging M365 suite and Google Workspace tools

PROJECTS

Full-Stack Portfolio Web Application with Public Leaderboard & REST API *FEB 2026*
React (Vite), Node/Express, MongoDB, Git/GitHub

- Designed and deployed a full-stack portfolio web app using React, Express REST API, and MongoDB.
- Developed a real-time Typing PRO game with 15/30/60-second modes and accurate gross WPM, net WPM, and accuracy calculations.
- Built a ranked leaderboard returning top-10 results per time mode using indexed MongoDB queries for efficient sorting.
- Implemented RESTful endpoints for health checks, contact submissions, and score persistence with input validation and structured error handling (200/400/500 responses).
- Developed a QA Test Lab module integrating API health checks, contract validation, negative test scenarios, and backend-driven test data to simulate automation tracking.

LEADERSHIP AND PROFESSIONAL INVOLVEMENT

Pioneers for Change Fellow

- Led an on-campus workshop for 200+ attendees, driving digital outreach and community engagement initiatives
- Managed event planning, stakeholder coordination, and structured delivery to ensure high participation and execution quality

Hackathon Participant, California StateUniversity - East Bay, Hayward, CA

- Collaborated in cross-functional team to prototype software solutions under time constraints
- Applied rapid problem-solving, technical communication, and core development fundamentals in a competitive environment

Operations Manager, GK Business group , Hayward, USA

- Directed digital marketing and website optimization initiatives to improve customer engagement and brand visibility
- Applied UI/UX principles, user flow optimization, and performance analytics to enhance campaign effectiveness
